

2025 Judging Criteria

Bathroom Projects

	CRITERIA	OUT OF
1.	<p>Quality of workmanship</p> <ul style="list-style-type: none"> Describe the methods used to achieve a high standard of function and finish. Use specific examples that show your attention to detail and commitment to quality in the design and construction. Highlight specific techniques, materials and planning approaches used to deliver a high-quality product. 	50
2.	<p>Pampering</p> <ul style="list-style-type: none"> Describe any luxury or spa-like elements that have been incorporated in the design to create a pampering environment. 	5
3.	<p>Use of building materials</p> <ul style="list-style-type: none"> Describe the materials used to deliver the project. Highlight any unique or innovative materials used, with examples. Explain how the materials used have helped you deliver a unique and high-quality result. 	10
4.	<p>Sustainability and innovation</p> <ul style="list-style-type: none"> Outline your approach to creating a sustainable space. Use specific examples of how you have maximized energy efficiency, reduced waste, or otherwise considered sustainability in your design and construction. Highlight any innovative features or methods that have contributed to a high-quality result. 	12

5.	<p>Complexity and delivery of design</p> <ul style="list-style-type: none"> • Describe your design approach. • Highlight any challenges or complexities associated with delivering your intended design, with specific examples. 	10
6.	<p>Functionality and overall standard of finish including plumbing, electrical, plastering, painting</p> <ul style="list-style-type: none"> • Describe how each element listed above has been completed to a high-quality finish. • Give specific examples of how your design, planning, methods and finishing have contributed to the form and function of your project. 	10
7.	<p>Client satisfaction and other factors</p> <ul style="list-style-type: none"> • Explain how well your project met the brief of your client. • Give any specific examples of feedback received from your client about the project. 	3

Sustainable Civil Construction

	CRITERIA	OUT OF
1.	<p>Workmanship/standard of finish</p> <ul style="list-style-type: none"> Describe the methods used to achieve a high standard of function and finish. Use specific examples that show your attention to detail and commitment to quality in the design and construction. Highlight specific techniques, materials and planning approaches used to deliver a high-quality product. 	10
2.	<p>Innovation</p> <ul style="list-style-type: none"> Highlight any innovative features or methods that have contributed to a high-quality result. Describe any unique approaches to problem-solving or design that set the project apart. Explain how you have incorporated technology into the project. 	20
3.	<p>Enviro, protection of flora fauna</p> <ul style="list-style-type: none"> Describe methods used to conserve and protect the environment (flora and fauna) during the construction. Explain how you identified potential wildlife habitats prior to construction. Give details of any consultation with environmental experts during your project planning. 	10
4.	<p>Complexity</p> <ul style="list-style-type: none"> Highlight any challenges or complexities associated with delivering the project, with specific examples. Explain how challenges and technical complexities were addressed, with specific examples. 	20
5.	<p>Layout</p> <ul style="list-style-type: none"> Describe how the layout of the project or site incorporated sustainable practices. 	2

6.	<p>Suitability to site conditions</p> <ul style="list-style-type: none"> Describe how site conditions such as site layout, geotechnical elements, ground and subsurface conditions were taken into account during the project. 	2
7.	<p>Application of enviro principles</p> <ul style="list-style-type: none"> Describe how the project was managed to minimise environmental impact throughout the project lifecycle. Outline your approach to waste management, energy conservation and use of sustainable materials and practices. 	2
8.	<p>Visual appeal</p> <ul style="list-style-type: none"> Describe how the project integrated aesthetic elements without compromising function. 	2
9.	<p>Protection of surrounding property</p> <ul style="list-style-type: none"> Explain measures taken to protect surrounding property during the project, such as surveying the site surrounds, shoring up, ground anchoring etc. 	2
10.	<p>Use of energy systems and devices</p> <ul style="list-style-type: none"> Give details of any energy systems and devices used during the project, including renewable energy sources, building management systems, building information modelling etc. 	2
11.	<p>Use of environmental recycled building materials</p> <ul style="list-style-type: none"> Describe any recycled materials used to create a more sustainable outcome. Explain how your use of recycled materials helped reduce energy use, environmental impact and construction costs. 	13
12.	<p>Reuse of onsite materials</p> <ul style="list-style-type: none"> Give details of how onsite materials were used during the project, such as inert/demolition materials, timber, metal items, steel sections, concrete etc. 	10

13.	Embedding sustainability into ongoing processes <ul style="list-style-type: none">• Explain how the project has helped introduce and incorporate sustainable practices and/or systems into your day-to-day business.• Highlight any specific processes or methods used on this project that you will continue to implement in future.	5
	GRAND TOTAL	100

Sustainable Commercial Construction

	CRITERIA	OUT OF
1.	<p>Workmanship/standard of finish</p> <ul style="list-style-type: none"> Describe the methods used to achieve a high standard of function and finish. Use specific examples that show your attention to detail and commitment to quality in the design and construction. Highlight specific techniques, materials and planning approaches used to deliver a high-quality product. 	30
2.	<p>Adherence to the environmental design brief by construction staff</p> <ul style="list-style-type: none"> Outline how the construction team were educated about environmental considerations during the project. Describe how you ensured all construction staff including employees and subcontractors adhered to the environmental design brief. 	4
3.	<p>Complexity</p> <ul style="list-style-type: none"> Highlight any challenges or complexities associated with delivering the project, with specific examples. Explain how challenges and technical complexities were addressed, with specific examples. 	8
4.	<p>Innovation in achieving sustainable construction</p> <ul style="list-style-type: none"> Highlight any innovative features or methods that have contributed to a high-quality, sustainable result. Describe any unique approaches to sustainable problem-solving or design that set the project apart. Explain how you have incorporated technology into the project to improve sustainability. 	8
5.	<p>Layout, siting, application of thermal principles</p> <ul style="list-style-type: none"> Demonstrate how layout and siting were considered to minimise the environmental impact of the project throughout its life cycle. Outline how thermal principles were incorporated to deliver energy efficient, comfortable spaces. 	3

6.	<p>Innovation in protection of existing environment</p> <ul style="list-style-type: none"> • Explain measures taken to protect the existing environment during the project. • Give examples of innovative ways the surrounding environment was protected and conserved during construction. 	2
7.	<p>Application of thermal performance options</p> <ul style="list-style-type: none"> • Give examples of methods and materials used to enhance thermal performance, including insulation, phase-change materials, glazing, draught proofing and ventilation. 	2
8.	<p>Transfer of skills and design to other projects</p> <ul style="list-style-type: none"> • Describe how the skills and design approach used in this project may be applied to other sustainable projects in the future. 	3
9.	<p>Use of energy and water saving systems and devices</p> <ul style="list-style-type: none"> • Give examples of the energy and water saving measures incorporated in the design and construction to achieve sustainability. 	10
10.	<p>Reuse or recycling of building materials</p> <ul style="list-style-type: none"> • Describe any recycled materials used to create a more sustainable outcome. • Explain how your use of recycled materials helped reduce energy use, environmental impact and construction costs. 	10
11.	<p>Reuse of onsite materials</p> <ul style="list-style-type: none"> • Highlight any areas where onsite materials were salvaged and reused in the construction. • Highlight examples of how concrete, wooden beams, steel and demolition materials were repurposed during the project. 	20
